

NOTICE TO PATIENTS ABOUT POTENTIAL CHARGES

This facility is part of Middlesex Hospital. For medical services provided to you at this facility, we charge a separate hospital fee, or facility fee, that is in addition to the professional fee charged by the physician or other medical professionals that treat you.

The amount that you will have to pay will depend on the professional medical services that are actually provided to you. If you have health insurance, you should contact your insurer for additional information about this facility's charges and fees, including any amounts that you may be potentially responsible for.

This facility is hospital based and your potential financial liability (the amount you may be responsible to pay) may be greater than if the professional medical services were not provided by a hospital-based facility.

Based on the information we have at this time, we have determined your potential financial liability, based on typical or average charges for visits to this hospital based facility, including the facility fee and professional fee likely to be charged, is \$1000.00. This amount does not include amounts owed to the physician or other health professionals who will bill you separately for their services.

If you have any additional questions regarding your financial responsibility, please contact your insurance company.

Patients may call 860-358-4870 for additional information on potential out of pocket costs.
