

Fluoride Testing Instructions

Your child needs fluoride for continued good oral health. Most cities and towns will add fluoride to the public water supply. If you have well water, your child may not be receiving the fluoride they need to protect their teeth now and in the future.

Your doctor has recommended that you have your well water tested. Some wells do contain a small amount of fluoride. If your water has no fluoride or a small amount, your doctor can give you a prescription for a supplement that your child can take once per day. Some wells contain too much fluoride, which can lead to permanent staining of the teeth. This would also be important for you and your doctor to know.

Please fill out the form below and mail it with a \$20 check or money order to:

UCONN Fluoride Service
Department of Pediatric Dentistry
University of Connecticut Health Center
263 Farmington Avenue
Farmington, CT 06030

Please, make the check out to UCONN Health Center.

Please feel free to ask us any other questions you may have.

Sincerely,
The Physicians and Staff of Middlesex Health Family Medicine

Please send a fluoride testing kit to the person listed below. A \$20 fee has been included as per the agreement with Middlesex Health Family Medicine.
